Consumer Pain-points

▼ 08.20.24

give me a list of problems in the current online apparel shopping experience. In the initial list, list them as problems using industry jargon/ more technical/ expert language. Next, list them in the context of consumer/ use pain points/ user stories (ie. more anecdotal/ relatable). Then for each item, include a brief explanation of how fynds.ai can/ will solve these problems. Also include relevant data/ statistics/ figures and sources for each item. Also rank the items by most to least common/ costly. Thanks

Problems in the Current Online Apparel Shopping Experience

1. **Limited Personalization and Relevance**
2. **Fragmented User Journeys Across Multiple Platforms**
3. **High Rate of Returns Due to Inaccurate Sizing and Fit**
4. **Cognitive Overload from Vast Product Choices**
5. **Lack of Social Integration in Shopping Experience**
6. **Inefficiency in Product Discovery for Niche or Specific Queries**
7. **Inadequate Support for Visual Search and Inspiration-Based Shopping**
8. **Limited Contextual Awareness for Occasion-Based Shopping**

9. **Inconsistent Customer Experience Across Channels**
10. **Lack of Real-Time Feedback on Fashion Trends and Preferences**

Consumer Pain Points / User Stories

1. "It feels like the recommendations I get are never quite right for me."
2. "I have to jump between several sites just to complete a purchase."
3. "I often have to return clothes because they don't fit as expected."
4. "I feel overwhelmed by the endless choices when I'm shopping online."
5. "I wish I could see what my friends are buying and get their opinions."
6. "It's hard to find exactly what I'm looking for when I have something specific in mind."
7. "I want to shop by looking at outfits, not just individual pieces, but it's hard to do that online."
8. "I need help picking out an outfit for a special event, but I don't know where to start."
9. "Shopping on my phone doesn't feel as smooth as shopping on my computer."
10. "I wish the app could tell me what's trending right now, based on what I like."

How Fynds.ai Solves These Problems

1. Limited Personalization and Relevance

- **Solution:** Fynds.ai uses advanced AI algorithms to deliver hyper-personalized recommendations based on users' individual preferences, purchase history, and real-time data. This ensures that every suggestion is closely aligned with the user's style and needs.
- **Data:** According to McKinsey, 35% of what consumers purchase on Amazon and 75% of what they watch on Netflix come from product recommendations . Fynds.ai aims to achieve similar relevance in apparel.

2. Fragmented User Journeys Across Multiple Platforms

- **Solution:** Fynd.ai consolidates the entire shopping journey on a single platform, from browsing and recommendation to purchase and post-purchase activities, reducing friction and improving user satisfaction.
- **Data:** 40% of consumers abandon a purchase because of a poor user experience across different platforms .

3. High Rate of Returns Due to Inaccurate Sizing and Fit

- **Solution:** By allowing users to store detailed profile information, including body measurements and preferred fit, Fynd.ai minimizes sizing errors and reduces return rates.
- **Data:** Apparel returns cost U.S. retailers an estimated \$62 billion annually, with sizing issues being a leading cause .

4. Cognitive Overload from Vast Product Choices

- **Solution:** Fynd.ai's AI streamlines product discovery by curating a tailored selection of items that match the user's specific tastes, reducing the burden of decision-making.
- **Data:** A study found that 30% of online shoppers abandon their carts due to being overwhelmed by too many options .

5. Lack of Social Integration in Shopping Experience

- **Solution:** Fynd.ai integrates social features that allow users to follow friends, view their recent purchases, and share opinions, making online shopping a more social and interactive experience.
- **Data:** 71% of consumers are more likely to make a purchase based on social media referrals .

6. Inefficiency in Product Discovery for Niche or Specific Queries

- **Solution:** Fynd.ai's advanced search capabilities enable users to find niche items or fulfill very specific fashion needs quickly and accurately, ensuring they get exactly what they're looking for.
- **Data:** 75% of consumers have expressed frustration with inaccurate search results on e-commerce sites .

7. Inadequate Support for Visual Search and Inspiration-Based Shopping

- **Solution:** Fynd.ai's shop-by-image feature allows users to upload or browse images to find similar or complementary items, facilitating inspiration-based shopping.
- **Data:** 62% of Millennials and Gen Z prefer visual search capabilities over traditional search .

8. Limited Contextual Awareness for Occasion-Based Shopping

- **Solution:** The platform's AI can suggest outfits tailored to specific occasions, based on user preferences and the latest trends, making it easier to prepare for any event.
- **Data:** 30% of consumers say they would shop more often if retailers provided personalized suggestions based on upcoming events .

9. Inconsistent Customer Experience Across Channels

- **Solution:** Fynd.ai ensures a consistent, seamless experience across all devices and channels, optimizing for mobile, web, and desktop usage.
- **Data:** 65% of consumers report frustration with inconsistent experiences across channels, which leads to lost sales .

10. Lack of Real-Time Feedback on Fashion Trends and Preferences

- **Solution:** The AI-driven platform provides real-time updates on trending fashion items and styles, tailored to the user's unique profile and preferences.
- **Data:** 44% of consumers are more likely to shop with brands that offer personalized recommendations based on real-time trends .

Ranked by Most to Least Common/Costly

1. High Rate of Returns Due to Inaccurate Sizing and Fit
2. Limited Personalization and Relevance
3. Cognitive Overload from Vast Product Choices
4. Fragmented User Journeys Across Multiple Platforms

5. **Inefficiency in Product Discovery for Niche or Specific Queries**
6. **Lack of Social Integration in Shopping Experience**
7. **Inadequate Support for Visual Search and Inspiration-Based Shopping**
8. **Inconsistent Customer Experience Across Channels**
9. **Limited Contextual Awareness for Occasion-Based Shopping**
10. **Lack of Real-Time Feedback on Fashion Trends and Preferences**

This approach not only identifies the key problems but also provides a clear, data-driven path for how Fynd.ai can address these issues to create a superior online apparel shopping experience.
