

Introduction

Fynd.ai is an innovative early-stage startup focused on revolutionizing the e-commerce landscape. Our platform leverages advanced artificial intelligence (AI) to enhance search capabilities and deliver highly personalized shopping experiences. Targeting the e-commerce apparel sector, Fynd.ai aims to function as an AI-driven personal shopper, capable of meeting even the most specific user queries.

Our Vision

Our Goal is to become the ultimate one-stop shopping solution, offering unparalleled personalization, convenience, and efficiency, transforming the way people shop online.

Personalized Shopping Experience

- Advanced AI delivers tailored product recommendations.
- Ensures efficient and satisfying user experiences.

Seamless Integration

- Integrated search, shopping, order tracking, & preference management.
- Provides a seamless, convenient shopping journey.

Efficiency and Accuracy

- AI streamlines search for faster, precise results.
- Helps users find exactly what they need, even with specific queries.

Market Leadership

- Establish Fynds.ai as the premier retail shopping platform.
- Set the standard for personalized e-commerce experiences.

Market Opportunity

01

Inefficient Search and Discovery

Consumers often struggle to find specific items due to inefficient search algorithms and overwhelming product choices, leading to a time-consuming and frustrating shopping experience.

02

Lack of Personalization

Many e-commerce platforms offer generic recommendations that do not cater to individual user preferences, resulting in lower customer satisfaction and engagement.

03

Fragmented Shopping Experience

Shoppers often have to navigate multiple platforms and websites to complete their shopping, track orders, and manage their purchases, leading to a disjointed and inconvenient experience.

The Fynd.ai Model

01

Efficient Search and Discovery

By leveraging AI-driven search capabilities and personalized recommendations, Fynd.ai can streamline the search process, making it faster and more accurate for users to find exactly what they are looking for.

02

Highly Personalized

Utilizing machine learning algorithms, Fynd.ai can provide highly personalized shopping experiences by continuously learning from user behavior and preferences, ensuring that users receive tailored product suggestions that match their unique tastes and needs.

03

Streamlined Shopping Experience

Fynd.ai aims to offer an integrated shopping solution where users can search for items, track shipments, and manage their shopping preferences all within a single platform, providing a seamless and cohesive shopping experience.

Our MVP

Web-based Platform:

Initial launch with a user-friendly website interface.

Mobile Optimization:

Mobile-friendly version to attract and validate assumptions about our core target audiences.

Manual Interaction:

Market Demand: Confirm interest and need for an AI personal shopper. AI Efficacy: Ensure ChatGPT effectively delivers desired shopping experiences.

AI-assisted Live Chat:

Real-time, AI-driven search assistance for personalized shopping. Leverages ChatGPT to understand and respond to specific user queries.

Validation Objectives:

Market demand for AI-driven personal shopping and effectiveness of AI APIs in delivering personalized search results before committing to full-scale development and integration.

Market Trends

The AI in fashion market is forecasted to grow significantly, with the market size expected to reach USD 28.48 billion by 2032, up from USD 1.43 billion in 2023. This represents a compound annual growth rate (CAGR) of 39.43% ([StraitsResearch](#)).

1 Trillion

Total Available Market (TAM) projected for 2024

Global E-commerce Apparel Market:
Scope: All business to consumer online retail transactions for apparel worldwide.

600 Billion

Serviceable Available Market (SAM) projected for 2024

Targeted Online Apparel Segments:
Scope: Focused on specific segments within the global online apparel market where personalized AI shopping is most impactful.

60 Billion

Serviceable Obtainable Market (SOM) at 10% market penetration

Young, Tech-Savvy Shoppers:
Scope: Primarily Gen Z and Millennials, who are early adopters of technology and prefer personalized shopping experiences.

Size of the Global Market

Fynd.ai is positioned within the \$1 trillion global e-commerce apparel market, focusing on high-impact segments where AI-driven personalization can transform the shopping experience. Our primary target is the \$60 billion market of young, tech-savvy consumers who seek advanced, personalized shopping solutions. This strategic focus ensures that Fynd.ai captures significant market potential while catering to the evolving needs of a digital-first audience.

205 Billion

Total Available Market (TAM) projected for 2024

U.S. E-commerce Apparel Market:

Scope: All business to consumer online retail transactions for apparel in the U.S.

123 Billion

Serviceable Available Market (SAM) projected for 2024

Targeted Online Apparel Segments:

Scope: Focused on specific segments within the global online apparel market where personalized AI shopping is most impactful.

12.3 Billion

Serviceable Obtainable Market (SOM) at 10% market penetration

Young, Tech-Savvy Shoppers:

Scope: Primarily Gen Z and Millennials in the U.S., who are early adopters of technology and prefer personalized shopping experiences.

Size of the U.S. Market

Fynd.ai targets the burgeoning U.S. personalized e-commerce market, projected to exceed \$500 billion by 2028. Our focus is on the \$200 billion segment of online shoppers seeking personalized solutions. With an aim to capture 5-10% of this segment, fynds.ai is positioned to achieve a market share worth \$10-20 billion, leveraging advanced AI to meet growing consumer demand for tailored shopping experiences.
